Woven PP Shipping Container Bulkhead

Woven Polypropylene

**Fast to Fit.
Tough on the Job.**

This Woven Bulkhead suits 6.1m (20ft) and 12.2m (40ft) shipping containers, they are used in many industries to store and transport chemicals, petrochemicals, minerals, agricultural products, seeds and food products.

Silverback liners are made for quick and easy installation, each woven bulkhead liner required 3-4 steel bulkhead bars. The liner is made from woven polypropylene laminated with LDPE film.

They make loading easy from the door end using a pneumatic pump, conveyor, or elevated to load under gravity depending on the loading system, or product being loaded.

Liners should always be stored flat in a clean and dry part of your warehouse. Care should always be taken that liners are not exposed to the elements or damaged.

COMPANION PRODUCT:

- Silverback can supply the steel bulkhead bars
- P/N:12100
- Normal requirement is 3 to 4 bars per bulkhead

FEATURES:

- Both doors can be open during loading and discharge can be as easy as tipping the container and slicing the bottom of the bulkhead.
