PACKAGING:

- Single (folded): 430mmx600mmx150mm
- Weight: 4.1kg
- 120pc per pallet = 492kg

Protect Containers, Reduce Clean-Up.

Silverback offers a large range of high quality liners. Open Top U-Liners are designed to be installed into containers to prevent contamination from leakage of corrosive and odorous liquids, which may occur from the pallets of animal hides or other transferable cargos, onto the floor timbers and walls of containers.

Overall Liner Length - 7.9m x 2.4 x 1.8m. U-Liner has a surplus length of 1.8M at the door end, which can be folded up and secured once the cargo is loaded to create a seal before the doors are closed.

Using a correctly installed Silverback Open Top U-Liner helps to reduce clean-up costs that occur when one isn't used.

The liners are folded to make it easy to unfold and erect.

- Place the liner 1 meter outside the container and unfold it to the front wall of the container.
- Unfold the entire length of the container until the floor is covered.
- Take the single sheet from the centre and lift it against the wall, then tape it securely to the wall.

Continue around the container.

TIPS:

1. Use cloth tape, as it can be easily pulled and torn off.
2. Feed your belt through the roll of tape, as this will free up your hands to check the liner.

1/2, Full Height and HWT (Heavy Weight) Hideliners are also available.
